

Lee Goullaud

Front End Developer

(604) 773-0145 · egoullaud@gmail.com · US/CA Citizen · Vancouver, BC · [Portfolio](#) · [LinkedIn](#) · [Github](#)

I am a creative, design-minded, and user-driven front end developer pivoting from six years as an owner of a landscaping company to front end development. I aim to create dynamic applications that deliver value and positive impact to users. My tech stack includes React, React Native, JavaScript, SQL, GraphQL, HTML, and CSS. As an engineer, I enjoy problem-solving, the look and feel of an application, and how it's working. My bachelors of science, experience running a business, and working freelance allows me to work efficiently in collaborative settings with high attention to detail, to communicate effectively with clients and colleagues, and a willingness to take on responsibility, learn, and grow in my role.

SKILLS

Languages - JavaScript, React Native, HTML, CSS | **Databases** - GraphQL & SQL

Libraries and Frameworks - React, Next, Bootstrap, Tailwind CSS, Material UI, Styled Components, GraphCMS, Apollo, Axios

Other - REST APIs, Agile methodology, JIRA, Web Accessibility, KanBan, Visual Studio Code, Git, GitHub, Vercel, Netlify, Slack, WordPress, Adobe Creative Suite, Microsoft Office, Figma, Zoom, MacOS, Windows OS, Linux

Interpersonal Skills: effective communication, problem-solving, collaborative, high work ethic, attention to detail, time management, proactive, leadership, critical thinking, creative, encouraging, dependable, responsible, focused, organized, strategic planning, research

SOFTWARE DEVELOPMENT PROJECTS

[GDI Hack for Health Hackathon](#) | [Strolls: a Walking Adventure](#) | [GitHub](#) | Second Place Winner

11/2022

React, React Native, JavaScript, HTML, CSS, TailwindCSS

- Built a mockup of a fully responsive application that encourages community building and exploration through taking a stroll. The app allows a user to map a walking route in their area, view photos shared by other users, and add photos of their own.
- Collaborated with 6 group members in a cross-functional team to complete the MVP within the 3-day deadline. Co-led the team in design, building the interface, debugging, git workflow errors, and deployment.
- Utilized React, Javascript, and CSS for the UX/UI of the application within the component file structure, grouped by feature, and utilized git control with commits and merges until deployment on Netlify. The app is currently being developed in React Native for a release in the app store this summer.

[Gamerverse](#) | [GitHub](#) | **React, API, JavaScript, HTML, CSS, Tailwind CSS**

10/2022

- Created a fully responsive application that features game information from RAWG API. The users can view upcoming, popular, and games by genre and includes search functionality..
- Used React, Tailwind CSS, and RAWG API for the front end of the application within the component file structure.
- Employed Git control in the production of the application with commits and pull requests until deployment, via Netlify.

PROFESSIONAL EXPERIENCE

Front End Developer | Upwork | Remote

06/2022 - Present

- Designed, built, and maintained fully responsive web applications for clients on strict deadlines using React, Javascript, GraphQL, HTML, CSS (including TailwindCSS, Material UI, and Bootstrap 5).
- Projects include:

[Grandma Finch's Maple Syrup](#) | [GitHub](#) | **React, JavaScript, HTML, CSS**

10/2022

- A fully responsive prototype for a mom and pop maple syrup company that displays product information, company about us, and contact page with form.
- Used React and TailwindCSS for the front end, with future plans to utilize GraphQL with a headless CMS in the back end. The application is hosted on Netlify.

[Raine Gauthier Photography](#) | [GitHub](#) | **JavaScript, HTML, CSS**

09/2022

- Built a fully responsive 10-page application for a client to show photography works on a three-week deadline.
- Utilized Javascript, HTML, and CSS for the front end of the application within the component file structure.
- Hosted the website through a web hosting service (HostGator), utilized FTP, transferred domain name, and trained clients on how to use and update the website.

Business Owner | Flowers By Elizabeth | Greater Vancouver Area

02/2015 - 12/2021

- Created contracting company specializing in garden design, maintenance, and winter tree pruning, servicing 150+ clients.
- Developed and managed 350+ projects, and 30+ long-term contracts, growing the client list by 40%.
- Hired, trained, mentored staff of 3 junior gardeners and worked in cross-industry teams to complete large scale projects.
- Built and maintained a Squarespace website, driving marketing and growing the customer base by 30%.

EDUCATION

SKILLCRUSH | REMOTE

03/2022 - 09/2022

Certificate of Completion, Break Into Tech: Front End & UX Design Course

Front end and UX design program focused on product development fundamentals, web accessibility, mobile first development, and front end programming (HTML, CSS, Javascript, React), and portfolio development.

UNIVERSITY OF BRITISH COLUMBIA | VANCOUVER, BC

Graduated 2018

Bachelor of Science in Natural Resource Conservation. Minor in Science and Management. Published in Wilson Journal of Ornithology.
