

Lee Goullaud

Full Stack Developer

(604) 773-0145 · egoullaud@gmail.com · US/CA Citizen · Vancouver, BC · [Portfolio](#) · [LinkedIn](#) · [Github](#)

I have solid skills in engineering and code design, with a focus on problem solving, debugging, and optimization. While my primary experience is in JavaScript and its related frameworks, I am actively learning and applying new languages. I am adept at creating documentation and commenting on code to ensure its maintainability, and can discuss technical and production issues with ease. I am a self-starter who excels at time management and can work independently, but also values clear communication and collaboration with team members. I have experience building distributed applications and pay close attention to detail to ensure their reliability and performance.

SKILLS

Languages & Frameworks - JavaScript, React, Express, Node, Next, GraphQL, SQL, HTML, CSS, Git

Databases - PostgreSQL, MongoDB, headless CMS(Contentful, GraphCMS), Cloudinary

Libraries - Bootstrap, Apollo, Axios, GraphQL-Request, Tailwind CSS, Material UI

Other - debugging, documentation, code review, agile, cloud platforms, UX design, Figma, web accessibility, REST APIs, GitHub, Visual Studio Code, Vercel, Netlify, Slack, Linux

Soft Skills: effective communication, team collaboration, highly adaptable, innovative, independent, time management, project management, attention to detail, problem-solver, empathetic, dependable, driven, extensive leadership experience.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Upwork | Remote

06/2022 - Present

- Design, build, deploy, and maintain websites for clients using Figma, React, MERN stack, PostgreSQL, Next, GraphQL, headless CMS, and TailwindCSS.
- Client projects include:

[SIXpo](#) | [GitHub](#) | **React, Next, GraphCMS, GraphQL, JavaScript, Tailwind CSS, Figma**

03/2023

- Designed with Figma, built front end with React, Next, and Tailwind CSS, and backend with GraphCMS/GraphQL.
- Code Maintenance: debugging, working with cross-functional team, adding new features as client requests
- Used version control with Git and Github, hosted on Vercel with custom domain name

[Raine Gauthier Photography](#) | [GitHub](#) | **React, Next, GraphCMS, GraphQL, JavaScript, TailwindCSS**

09/2022

- Designed and built a photography website for a client featured gallery pages, about, and contact page with form
- Built with React/Next, Tailwind, and Apollo on the front end and GraphQL and GraphCMS on the backend.
- Used GitHub for version control and deployed on Vercel.

Business Owner | Flowers By Elizabeth | Greater Vancouver Area

02/2015 - 12/2021

- Developed and managed 350+ projects, and 30+ long-term contracts, grew the client list by 40% during COVID.
- Hired, trained, mentored staff of 3 junior gardeners and worked in cross-industry teams to complete large scale projects.

SOFTWARE DEVELOPMENT PROJECTS

[GDI Hack for Health Hackathon](#) | [Strolls: a Walking Adventure](#) | [GitHub](#) | **Second Place Winner**

11/2022

React, JavaScript, HTML, CSS, TailwindCSS

- Collaborated in a cross-functional team to complete the MVP within the 3-day deadline, winning 2nd place.
- Co-led the team in design, building the interface, debugging, git workflow errors, and deployment, held a React/TailwindCSS paired programming lesson with juniors on the team.
- Built with React, Javascript, and TailwindCSS, and utilized git control until deployment on Netlify.

[Gamerverse](#) | [GitHub](#) | **React, API, JavaScript, HTML, CSS, Tailwind CSS**

10/2022

- Created a fully responsive application that features game information from RAWG API. The users can view upcoming, popular, and games by genre and includes search functionality..
- Used React, Tailwind CSS, and RAWG API for the front end of the application within the component file structure.
- Employed Git control in the production of the application with commits and pull requests until deployment, via Netlify.

[Grandma Finch's Maple Syrup](#) | [GitHub](#) | **React, JavaScript, HTML, CSS, Tailwind CSS**

10/2022

- A fully responsive prototype for a mom and pop maple syrup company that displays product information, company about us, and contact page with form.
- Used React and TailwindCSS for the front end, with future plans to utilize GraphQL with a headless CMS in the back end. The application is hosted on Netlify.

EDUCATION

SKILLCRUSH | REMOTE

03/2022 - 09/2022

Certificate of Completion, Break Into Tech: Front End & UX Design Course

Front end and UX design program focused on product development fundamentals, web accessibility, mobile first development, and front end programming (HTML, CSS, Javascript, React), and portfolio development.

UNIVERSITY OF BRITISH COLUMBIA | VANCOUVER, BC

Graduated 2018

Bachelor of Science in Natural Resource Conservation. Minor in Science and Management. Published in Wilson Journal of Ornithology.
